Adhesive Performance
The adhesive features high initial tack, excellent adhesion and
good low temperature performance on a wide variety of
substrates. Specially designed for wine labelling applications it
allows easy conversion of difficult label shapes.

Shelf Life
To obtain optimal performance, use this product within two years
of the date of manufacture, under storage conditions as defined
by FINAT (20-25°C; 40-50%RH). Prolonged storage outside
these conditions might reduce the shelf life.

Applications and Use
This product is designed for Wine labelling, it is suitable for primary
labelling of high and premium goods eg: spirits, specialist foods.

These results are based on tests carried out by our suppliers and our own
experience. Etiqueta.es cannot give any guarantee for the optimal adhesion of
the materials. Etiqueta.es assumes that the customer checks the suitability of
the materials, meets his needs and decides for the right material that meets his
requirements. The labels should be stored in a dryplace, at an ambient
temperature of between 20° - 24 °C and protected from the effects of the
weather, such as sun, rain or snow. The adhesive reacts very quickly, especially
to the effects of weathering.
